Borders in one click!
SO EASY..

Leverage the power of Templates that include text and designs, change either to create a personalized design instantly

A *Template* is an editable design file with all elements individually selectable and editable: each of the multiple text strings and artwork in a given template can be individually edited to create an entirely new, personalized design. Replace an existing design with a new one, and change text and font to create a new set of designs for a sports team without the fuss of digitizing. Templates give you endless creative power.

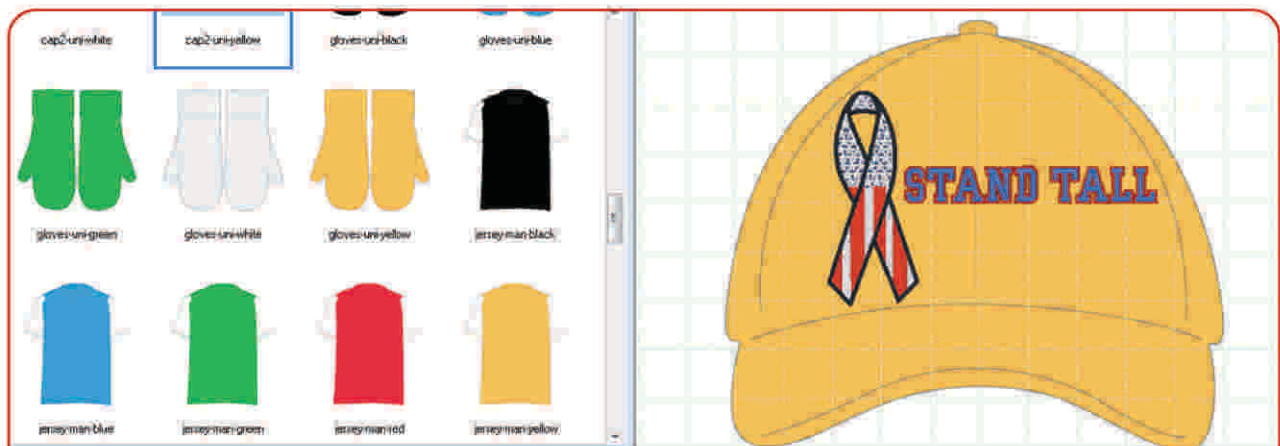

Autograph

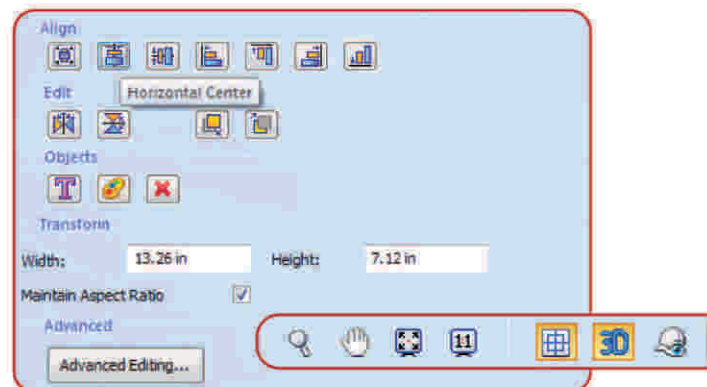

Visualize Design on Garment

Great for instant customer approval and for visual confirmation, the Garment Preview allows you to see the design on the garment of your choice. Many Garment types included, and more will be added in later versions.

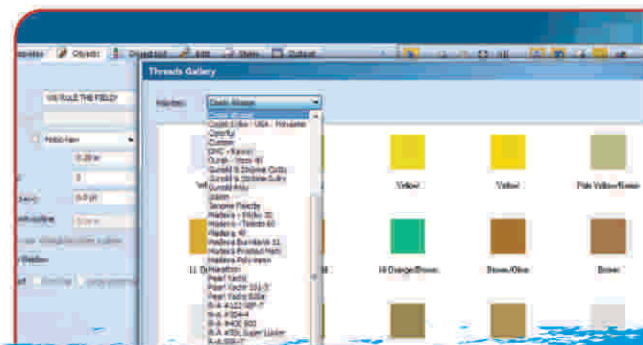

Editing Power

Edit designs using tools like Align, Transform, Rotate, etc. to ensure that the design is perfect for the job at hand. Other tools like Zoom, fit to Screen, Grid settings, help you to view the design in different ways. If you need to make additional changes, click on the Advanced Editing button- it opens up the power of Tajima DG/ML by Pulse for you.

Thread Charts

With many popular thread charts included for easy color selection, making design changes to match available threads is now an easy process. Simply work with the thread colors that you prefer.
